Analysis of the above graph is given below

Note: This analysis is done only on female employee.

- Investment department has the highest average absent hour (89.38) and lowest average service length (3.54). That means here female employee retention is an issue and that may be the reason for frequent absent among the female employees.
- The average absent hour in executive department is very high (61.95)
- In human resource division other than compensation department have very high average absent hour. This may be due to high average age among female employees and high average service length. For example, labor relation department has highest average absent hour (74.64) among all department in this division. This may be due to the female employees those are working here have average age more than 51 and average service length more than 20 years. So, all the

female employees are aged and senior. This issue is reflecting in the average absent hour.

- In store the average absent hours are more than 61 irrespective of any department in this division. Interestingly the average length of service is store division is less than 5 years irrespective of any department. That means here female employee retention is an issue. The female employees are not so much attached with the organization that why the tendency of absence is more in this division.

5) Impact of average age and average service length on average absent hours for various department among male employees.

Distribution of avg. absent hours, avg. age and avg. length service based on department among male employee

Average of Absent Hours, average of Age and average of Length Service for each Department Name broken down by Division. Color shows details about Division. For pane Average of Absent Hours: The marks are labeled by average of Absent Hours. For pane Average of Age: The marks are labeled by average of Age. For pane Average of Length Service: The marks are labeled by average of Length Service. The data is filtered on Gender and Age. The Gender filter keeps M. The Age filter ranges from 18 to 65.

Analysis of the above graph is given below

Note: This analysis is done only on male employee.

- In human resource division recruitment and training have very high average absent hour. This may be due to high average age among male employees and high average service length. For example, recruitment department has highest average absent hour (64.53) among all department in this division. This may be due to the male employees those are working here have

average age more than 54 and average service length more than 25 years. So, all the male employees are aged and senior. This issue is reflecting in the average absent hour.

- In store the average absent hours are more than 50 irrespective of any department in this division. Interestingly the average length of service in store division is less than 5 years irrespective of any department. That means here male employee retention is an issue. The male employees are not so much attached with the organization that why the tendency of absence is more in this division.

6) Gender wise distribution of average absent hours among all department.

Genderwise distribution of average absent hours among all department

Average of Absent Hours for each Gender broken down by Department Name. Color shows details about Gender. The marks are labeled by average of Absent Hours. The data is filtered on Age, which ranges from 18 to 65.

From above figure it is easily understood that the tendency of being absent is much more among female employees than male employees. In few departments like investment, labor relation, legal, store management etc. the female employees absence is depicting an alarming situation than male employees.

7) Average absent hours based on job role.

Distribution of avg. absent hour based on job title

Average of Absent Hours for each Job Title broken down by Division and Department Name. Color shows details about Department Name. The marks are labeled by average of Absent Hours. The data is filtered on Age, which ranges from 18 to 65.
